Chairman's Message

Mr. Francois-David MARTINO

Chairman

"**Q3** CY26 marked further progress in strengthening John Cockerill's global operating platform and building the capabilities required for our next phase of growth. We delivered strong year-on-year revenue growth, with Standalone Revenue increasing approximately **80% to ₹174.4 crore** during Q3 and more than doubling to **₹523.6 crore for the first nine months of CY26**. While operating profitability continues to reflect the early execution stages of several projects, the quarter included an **exceptional gain of approximately ₹53.6 crore**, resulting in Standalone Net Profit of approximately **₹32.2 crore**.

Our Consolidated performance reflects the increasing scale of our international platform, with Revenue from Operations of approximately **₹316 crore in Q3 and ₹959 crore for the first nine months of CY26**, representing year-on-year growth of approximately **22% and 31% respectively**. Consolidated Net Profit for Q3 was approximately **₹11.1 crore**, while the first nine months recorded a Net Loss of approximately **₹12.9 crore**. Our focus remains on translating this increased scale into stronger execution, margins and sustainable profitability.

Project Vulcan reached an important milestone, with the requisite regulatory approvals received and **35,185 CCPS allotted to John Cockerill SA**, advancing the consolidation of our global entities under John Cockerill India Limited. The associated financial impact is expected to become relevant in Q4 CY26.

We are also investing ahead of future growth. Since September 2025, we have added more than **100 employees in India and more than 30 in China**, with a further plan of hiring approximately **50 across both operations by year-end**, strengthening our engineering, project execution and operational capabilities.

Our MoU with the Government of Maharashtra, focused on advanced green iron and steel technologies and supporting the development of Gadchiroli as a green steel hub, represents another important strategic opportunity and provides a platform to explore **low-temperature electrolytic ironmaking technology** under Indian operating conditions.

Looking ahead, we remain confident in John Cockerill India Limited's medium-to-long-term prospects. With India continuing to see strong investment in steel capacity, advanced processing technologies, plant modernisation and lower-carbon steel production, our integrated global platform, expanding execution capabilities and investments in people provide a stronger foundation to translate these opportunities into **sustainable growth and improved profitability."**

Strategic Government Engagement

Maharashtra MoU | Advancing Green Iron & Green Steel

2 September 2026 — MoU signed between John Cockerill India Limited and the Government of Maharashtra.

Strategic objective

- Explore advanced technologies for green iron and green steel production.
- Support Maharashtra's ambition to develop Gadchiroli as a future Green Steel Manufacturing Hub.
- Evaluate technology pathways aligned with the state's green industrial development objectives.

4 September 2026 | Formal MoU Exchange
Jio World Convention Centre, Mumbai, during the official visit of the Prime Minister of Belgium.

In the presence of the Prime Minister of Belgium, the Chief Minister of Maharashtra and the Union Minister for Commerce and Industry, with the MoU exchanged by the Group CEO of John Cockerill and senior Government of Maharashtra representatives.

A Reminder of Who We Are

John Cockerill India Limited

Metals Business — Three Pillars

A trusted global supplier of sustainable & high-performance solutions for the steelmaking industry

01 Processing & Rolling

- Pickling Lines & Solutions
- Acid Regeneration Plants
- Cold Rolling Mills
- Continuous Annealing Lines
- Continuous Galvanising Lines
- Colour Coating Lines
- JVD (Jet Vapor Deposition)

02 Iron & Steel Making Technology

- **Volteron™ — CO_2-free steelmaking
- Electric Arc Furnaces (EAF)
- Hydrogen in steelmaking
- Pelletizing Units
- DRI Solutions

***Volteron is not part of the consolidation*

03 Services & Energy Efficiency

- Fit-to-purpose upgrading
- Decarbonising existing plants
- Process & tech consultancy
- Customised spares & services
- Mathematical models
- Automation & Technology Control

Revolutionary Technology — Jet Vapor Deposition (JVD)

A breakthrough in zinc coating — developed in partnership with ArcelorMittal

An advanced coating process that vaporizes zinc in a vacuum and deposits it onto steel at sonic speeds, creating a uniform, adaptable coating ideal for automotive, appliance, and industrial applications.

1 Million Tons

JVD coated steel already produced & sold from ArcelorMittal Kessales

2x Faster

Than existing HDG and EG galvanisation processes

Less CO_2

Low energy consumption, environment friendly process

99.5% Yield

High-speed production with minimal waste

Competitive Advantages

- Customizable coating thicknesses
- Superior surface quality
- Uniform and consistent output
- Better resistance to corrosion
- Flexibility to install independent lines

Steel Sector Outlook & India Opportunity

India — The World's Fastest Growing Steel Market

#2

World's 2nd Largest
Crude Steel Producer

~152 MT | ~9% global share

- Steel capacity target: 300 MTPA by 2030-31
- ~USD 156 billion investment planned
- Carbon emission reduction targets: 20% by 2030
- Green hydrogen-based steelmaking as focus area
- 100% FDI allowed in the sector

Growth Drivers for JCIL

Innovation & Technology

New routes for better efficiency — JVD, Volteron™, hydrogen steelmaking

Steel Decarbonisation

Green steel manufacturing and revamping of existing plants globally

India Market Growth

World's fastest growing market with increasing demand for high-end products

Policy Support

Government push for self-reliance in steel with supportive industrial policies

Business Strategy & Way Forward

01

Portfolio of Technologies in Steelmaking

Establish a market relevant portfolio of technologies in green steel, high strength steel and become a global Tier 1 steelmaking solutions provider.

02

Fostering Global Partnerships

Foray into upstream steel making processes with focus on decarbonization by building strategic alliances and collaborations.

03

Streamlining Client Operations

Implement advanced digital tools and technologies to enhance productivity with adjacencies in servicing and supply of spares.

04

Consolidation of Metals Business

Improve operational efficiencies and remain closer to key customers with localized offering and better margins.

New Technology & Manufacturing → Strengthen Customer Services → Explore JV / Inorganic Opportunities
