John Cockerill

Press Release

Mumbai, November 23, 2026

The PAC for the successful revamping of CGL-5 was exchanged between Shishir Naik, Vice President and Business Head – Revamps, Spares & Services, John Cockerill India Limited, and RP Gupta, Plant Head – Ranihati, Jindal (India) Limited, in the presence of the John Cockerill India and Jindal (India) project teams.

John Cockerill India Successfully Revamps Jindal (India) Limited's CGL-5, More Than Doubling Production Capacity

John Cockerill India Limited has successfully completed the revamping of the Continuous Galvanizing Line (CGL-5) at Jindal (India) Limited's facility in Ranihati, West Bengal, marking another milestone in its commitment to delivering value through modernization and long-standing customer partnerships.

Following the revamp, the line's production capacity has more than doubled, increasing from **22 tonnes per hour to 45 tonnes per hour**. The successful commencement of prime coil production and the subsequent receipt of the PAC from Jindal (India) Limited mark the successful completion of this important project milestone.

The revamp enables Jindal (India) Limited to significantly enhance production capacity and unlock greater potential from its existing assets. The project also demonstrates how targeted modernization can deliver substantial performance improvements while helping customers maximise the value of their existing investments.

Commenting on the achievement, **Fred Martin, Managing Director, John Cockerill India Limited**, said: “This project demonstrates how the right modernization solutions can unlock significant value from existing assets. We are pleased to have supported Jindal (India) Limited in enhancing its production capacity and appreciate the trust they continue to place in John Cockerill. This achievement reflects the commitment and technical expertise of our teams.”

Through its dedicated **Services & Energy Efficient business**, John Cockerill India delivers value-added solutions encompassing equipment revamping, modernization and performance optimisation. By combining technical expertise with a strong understanding of customer requirements, the company helps steel producers improve operational performance, enhance productivity and extend the value of their equipment.

John Cockerill India Limited thanks Jindal (India) Limited for its continued trust and partnership and congratulates the project teams and everyone involved in successfully delivering this achievement.

About John Cockerill India Limited

‘John Cockerill India Limited.’ John Cockerill Industry’s Indian hub and center of excellence for cold rolling mill complexes, is the world leader in the conception, manufacture, and installation of reversible cold rolling mills. It has developed a wide range of technologies in the field of processing lines, rolling mills, thermal and chemical processes. It also supplies auxiliary steel treatment equipment. John Cockerill India offers the entire product portfolio of John Cockerill Industry and is coordinating the whole range of its activities including, but not limited to local engineering, sourcing and manufacturing. As an international specialist in industrial processes and technologies, John Cockerill Industry designs, supplies and modernizes cold rolling mills, processing lines, chemical and thermal treatment installations for the steel and the non-ferrous industry, as well as state-of-the-art heat treatment technologies for the aviation, forging and casting industry, and hydrometallurgical processes for the extraction of ores.

John Cockerill India complements John Cockerill’s strategy for growth with minimal overlaps in products and a versatile range of technology synergies. John Cockerill India is a preferred partner to supply of innovative solutions for clean, reliable and efficient equipment worldwide.
